COLOR-COORDINATED ALUMINUM-WOOD DOOR

- Multi-layer solid wood board
- Moisture-proof carbon crystal board

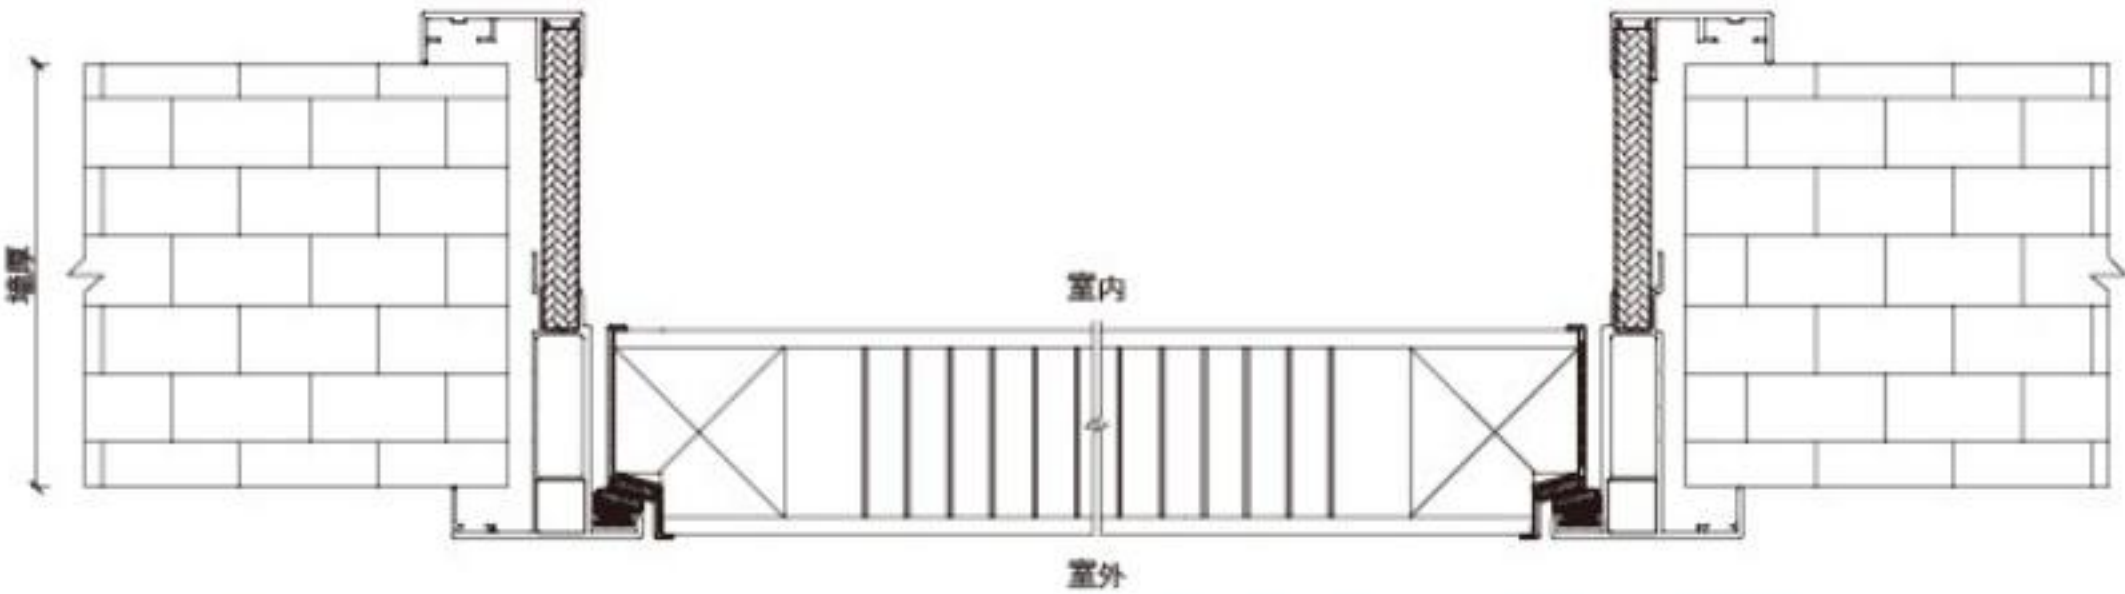

外平内开极窄 同色铝框

Flush outside and open inside -
very narrow
Same color aluminum door frame

设计理念

采用外平内开的设计理念，以简洁的线条和纯粹的设计，增强了外立面的整体美感。这种设计不仅满足了室内空间对门的美观度要求，更在实用性上大放异彩。

The design concept of flat outside and open inside is adopted, with simple lines and pure design, which enhances the overall beauty of the facade. This design not only meets the aesthetic requirements of the indoor space for the door, but also shines in practicality.

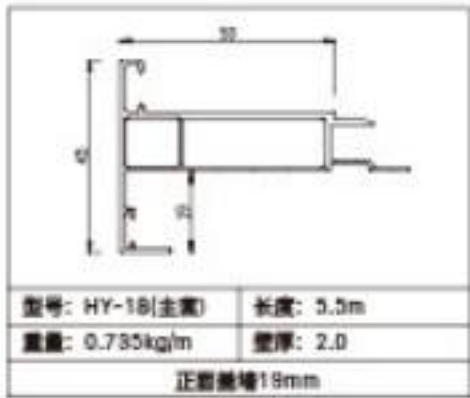

铝木门见光包框的计算公式:

- 见光宽+50=包框尺寸高 •门扇宽+34=包框尺寸宽 (含8厘缝)
- 见光高+25=包框尺寸宽 •门扇高+26=包框尺寸高 (含10吊脚)

Calculation formula for visible frame of aluminum wooden door

- Visible light width+50=package frame size height
- Door leaf width+34=package frame size width (including 8mm seam)
- Visible light height+25=package frame size width
- Door leaf height+26=Package frame size height (including 10 hangers)

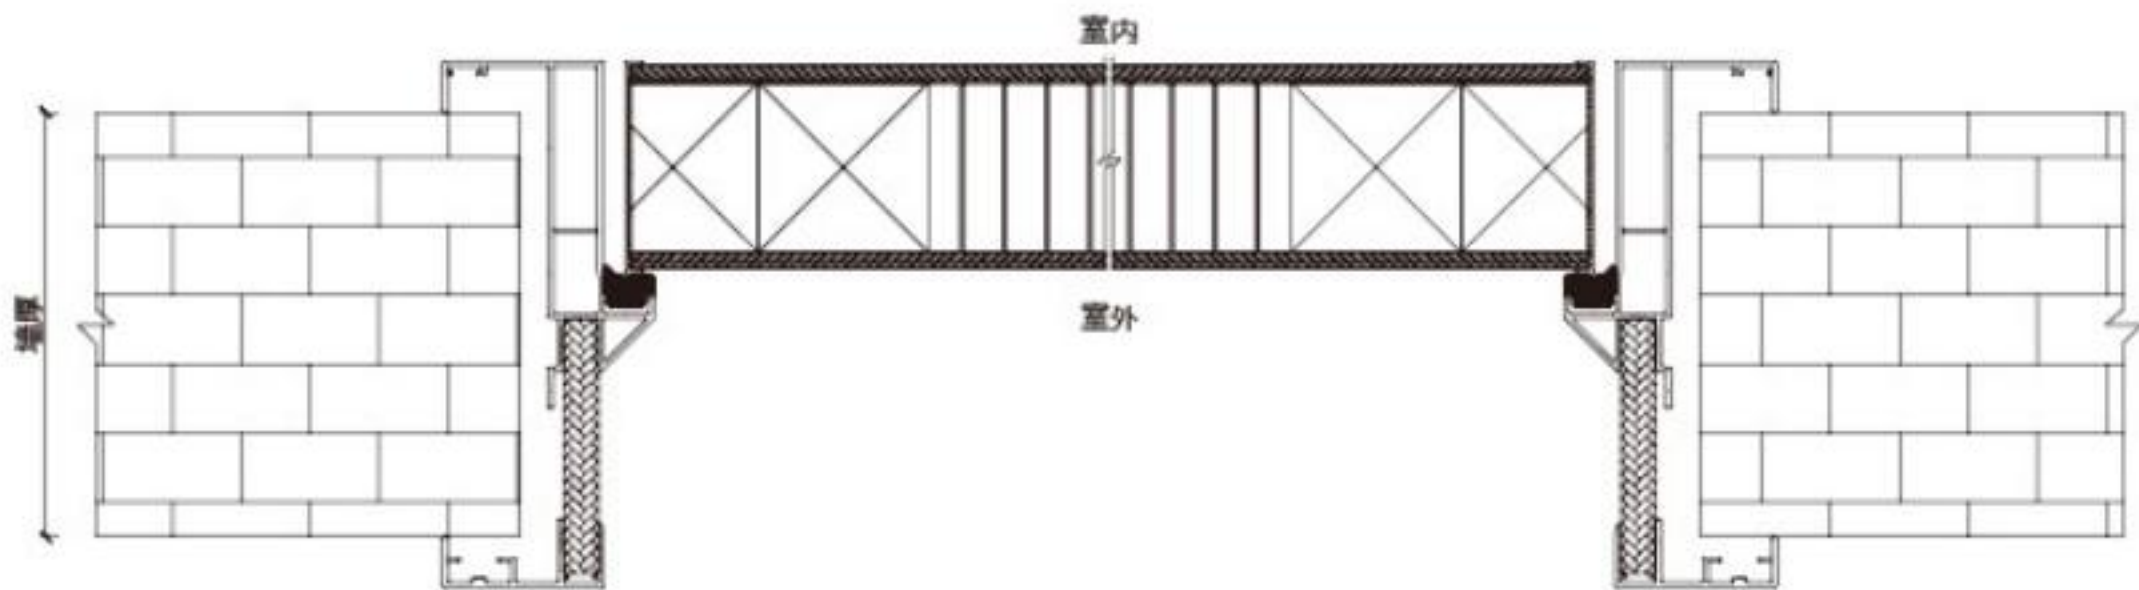

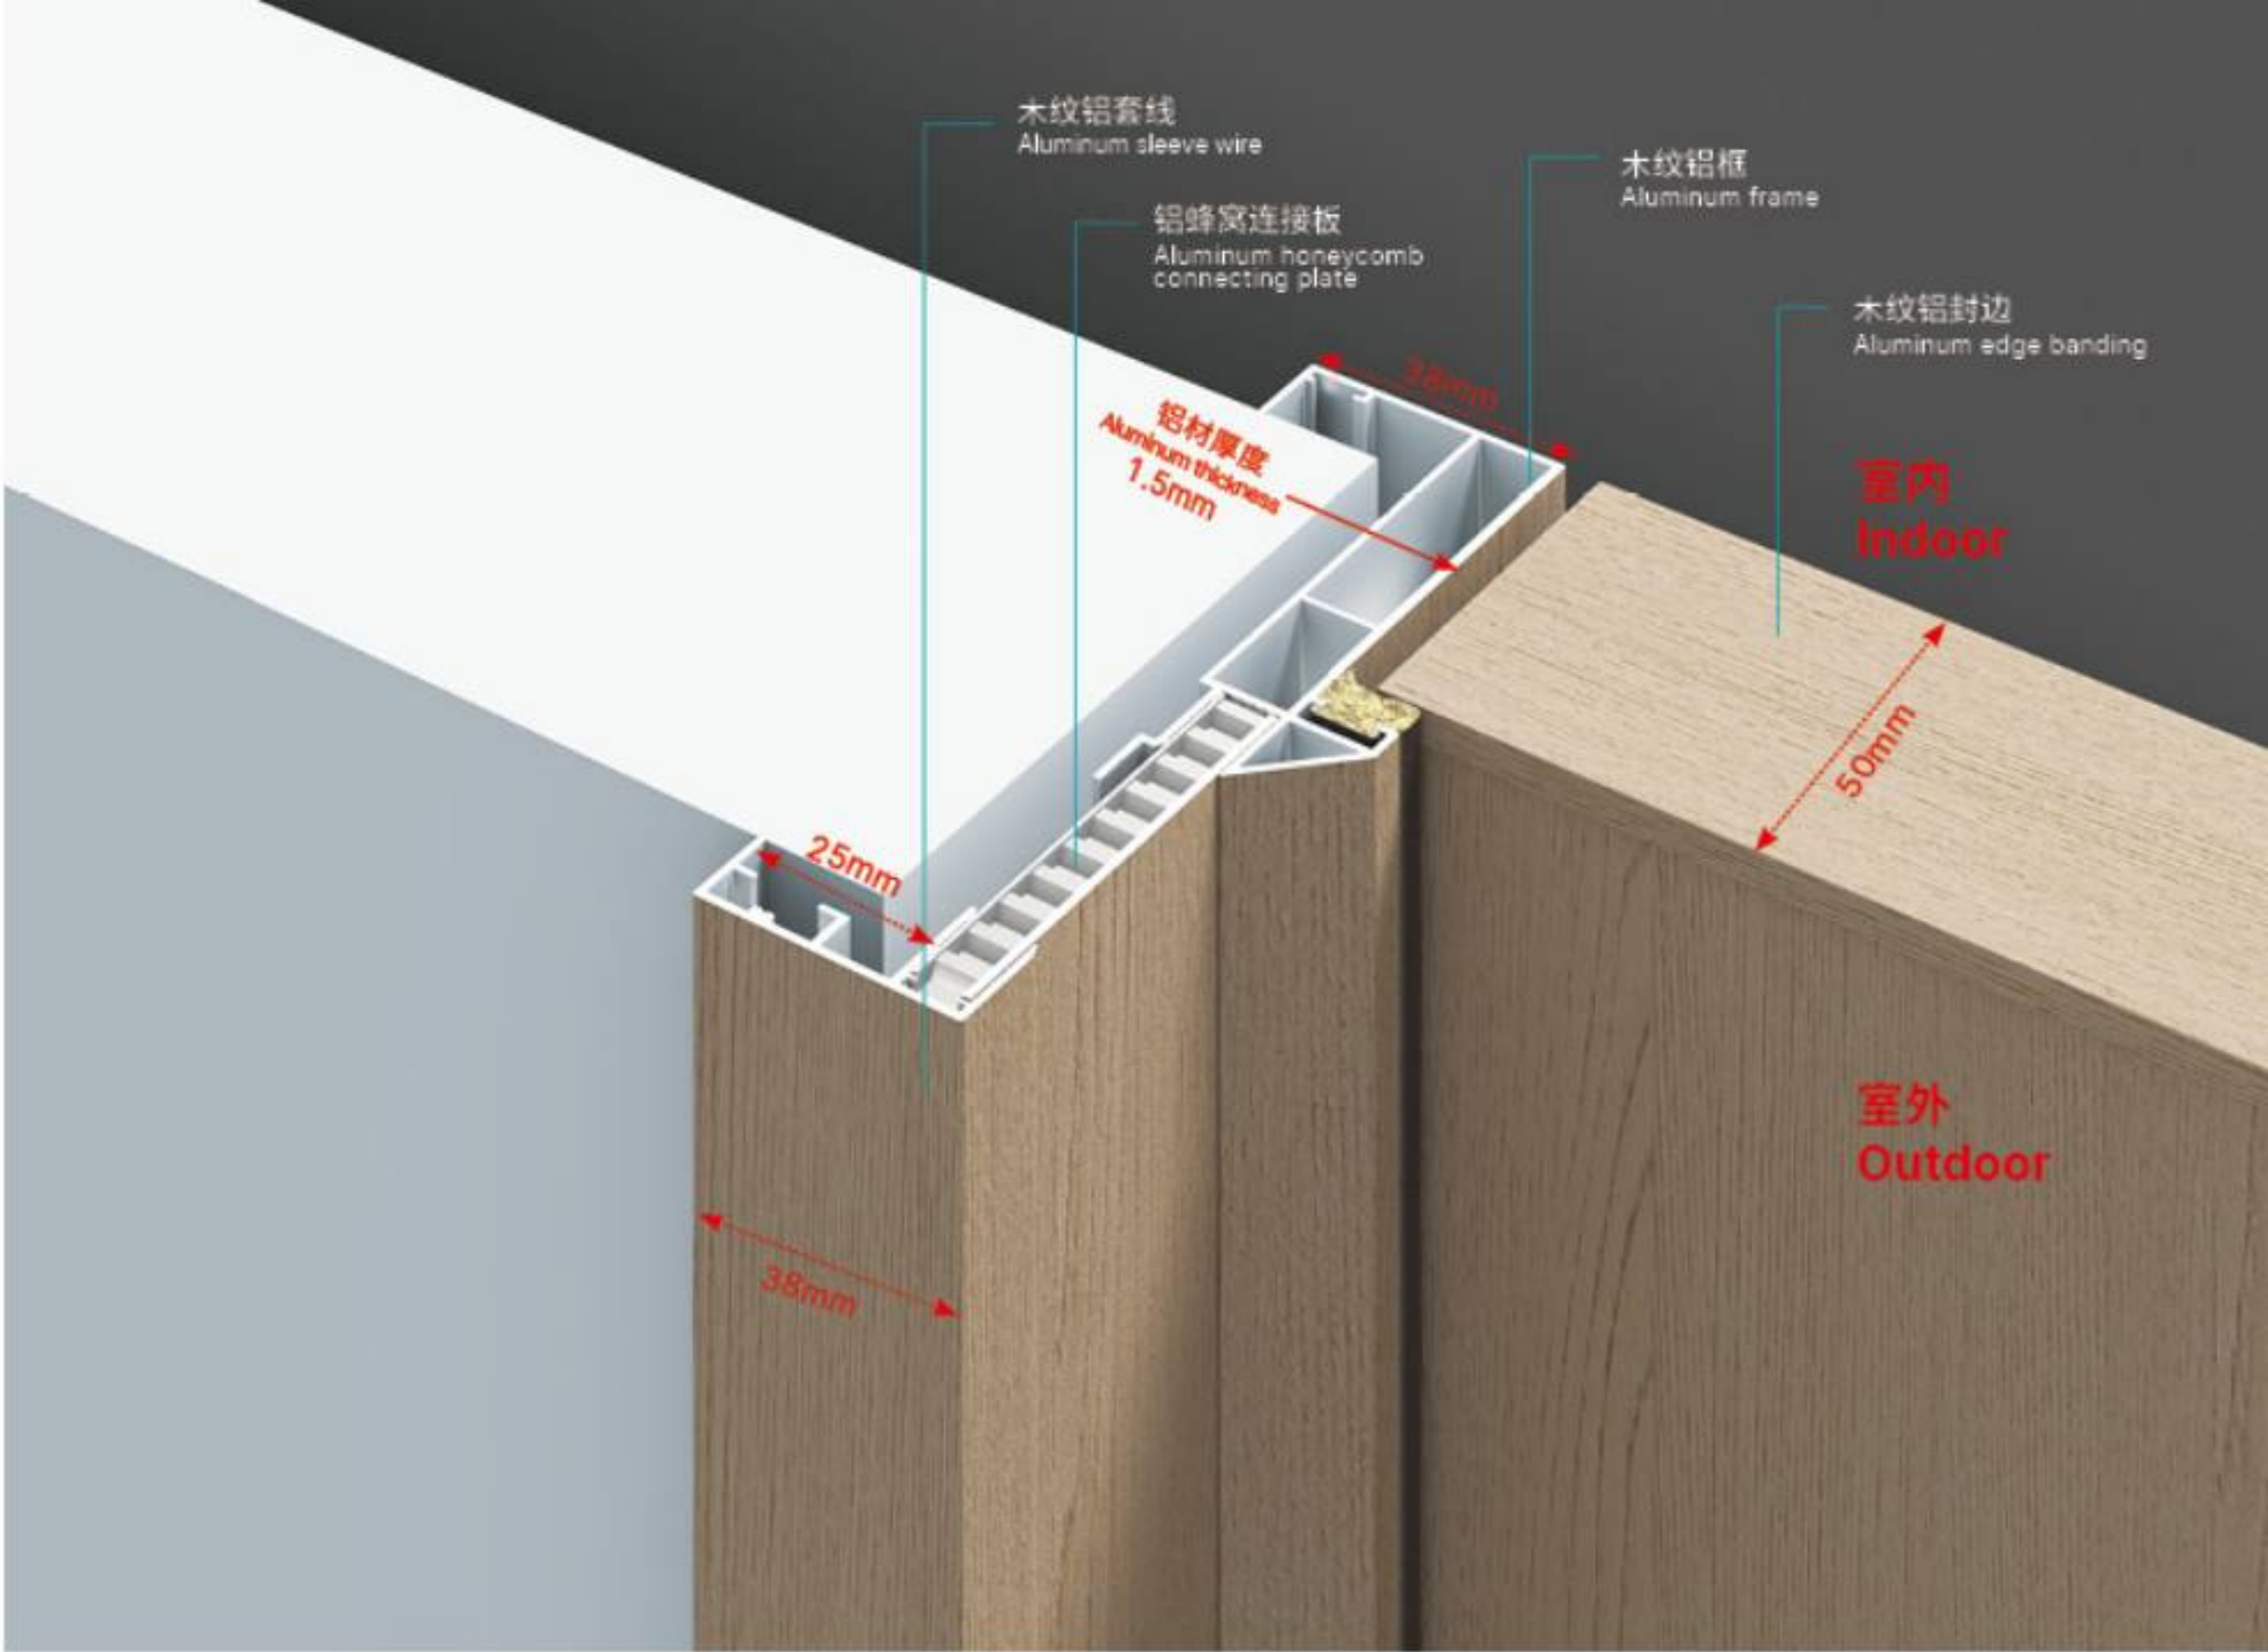

内平内开极窄 同色铝框

Inward opening-extremely narrow
Same color aluminum door frame

设计理念

用极窄的线条打破传统，摒弃厚重，
以细窄边框传递“少即是多”的生活态度。

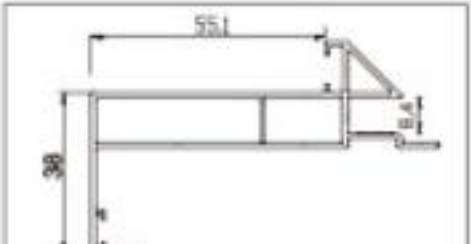

Breaking tradition with extremely narrow lines and
abandoning heaviness, Convey the life attitude of
'less is more' with a narrow border.

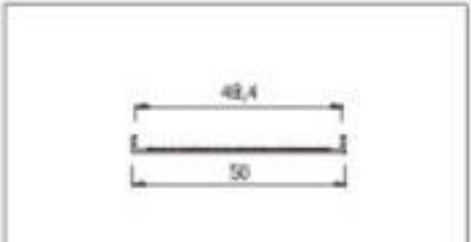

铝木门见光包框的计算公式：

- 见光宽+50=包框尺寸高
- 门扇宽+34=包框尺寸宽 (含8厘缝)
- 见光高+25=包框尺寸宽

温馨提示

- 1、由于板材批次不同，可能会有轻微色差，属正常现象，非质量问题。
- 2、色板妥善保存，避免不使用的時候长时间打开、日晒、灯照等容易引起色板变色的因素。
- 3、由于图册批次不同由手工生产，安装色卡数量过多，下单请用电子图册核对色卡安装是否有误。本公司保留最终解释权。

Tips

1. Due to different batches of boards, there may be slight color differences, which is a normal phenomenon and not a quality issue.
2. Properly store the color palette to avoid factors that can cause discoloration, such as prolonged use, exposure to sunlight, and lighting.
3. Due to different batches of manual production in the catalog, there are too many color cards installed. Please use an electronic catalog to check if there are any errors in the installation of the color cards when placing an order. Our company reserves the right of final interpretation.
